

Does your child need a gastrostomy feeding tube?

The **What? Why? Children in Hospital (WWCIH)** charity has created two videos about tube feeding.

The first video shows the feeding team in hospital explaining what happens during the operation and how the gastrostomy will help your child (GT-hospital).

The second video shows how to look after the gastrostomy feeding tube at home (GT-home).

Please note that the actual tests might vary from what is shown in the videos. Contact the hospital if you have concerns about your child's appointment.
